EasyDICTATE

Speech-to-Text with Unparalleled Accuracy

Our speech-to-text technology incorporates deep learning, artificial neural networks, and natural language processing to build a sophisticated and personalized model unique to each speaker. This is not a one-size-fits-all model that most of our competitors use. Accuracy is the key metric for our EasyDICTATE automatic speech recognition (ASR) engine.

✓ **Sophisticated Artificial Intelligence**

AI-powered automatic speech recognition builds personalized models unique to individual speakers and specialized vocabularies for accurate transcripts.

✓ **Templates**

Use your own templates and match each template to report type based on content.

✓ **eSignature**

Add your own customized eSignature, either in text format or jpeg.

✓ **Single Audio – Multiple reports**

A single audio file containing reports of multiple patients can be split into separate documents based on keyword separators.

✓ **Security**

SSL Certificate, HIPAA Compliant, Firewall

✓ **Encrypted VPNSub-Headings**

The AI of our ASR engine can insert any sub-headings wherever you want them.

For example: You dictate

”Blood pressure is ...”

and you want your transcript to look like

PHYSICAL EXAMINATION: Blood pressure is ...

✓ **Fast Turnaround (TAT)**

ASR with AI transcripts returned in minutes. ASR transcripts edited by humans returned within 24 hours or less. (Rush available.)

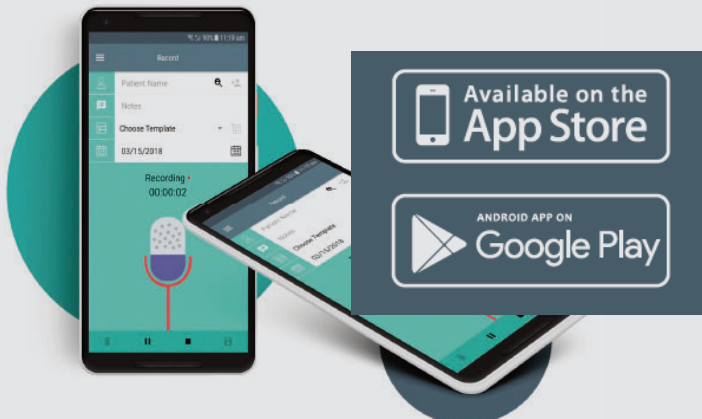

✓ **Customization**

We offer any customization you require.

Easy to use, intuitive, and accurate, easyDICTATE dictation with secure cloud-based transcription is perfect for busy and active **physicians, nurses, IMEs/ DMEs/AMEs, claims managers, attorneys, social workers, and other professionals,** and for **multi-speaker** interviews and meetings.

DON'T TAKE OUR WORD FOR IT!
