Medical Bill Review

A Leading **Subcontractor** since 1999 for
*Outsourced Medical-Legal
Documentation & Data Services*

Fully managed Medical Bill Review from Numina Cost Containment

IMPROVE MANAGEMENT OF RISING MEDICAL COSTS — EMPLOYERS' NUMBER ONE CHALLENGE TODAY!

Numina provides workers compensation companies the ability to match Utilization Review (UR) determinations with the bills submitted for payment by providers. WC companies can **reduce post-payment losses for treatments not authorized by UR, eliminate the laborious current review burden, and streamline the process to handle discrepancies between UR decisions and provider-delivered treatment.**

With the cost of insurance rising across many types of coverage, staying on top of trends in the medical bill portfolio is more important than ever. Many insurers and TPAs conduct bill reviews with their business customers on a regular basis, but the depth of the reviews varies, often failing to unlock the maximum benefit for each situation or yield significant benefits for their efforts.

Numina Cost Containment can help spot problem areas and opportunities sooner to help reduce risk pre-loss and to better control costs post-loss.

WEIGHED DOWN WITH COST CONTAINMENT CONCERNS?

Numina Cost Containment helps clients control the cost of medical bills. Our comprehensive medical bill review process ensures that clients can deliver maximum savings through our suite of services that includes bolstering confidence in medical billing accuracy, identifying gaps, reducing anxiety caused by provider and member friction, identifying and recovering overpayments, ensuring bills were paid correctly, easing stress regarding overpaid bills, and — more importantly — reducing stress on your internal resources to recoup payments due.

Numina Cost Containment offers broad experience in automated and complex medical bill reviews with payment integrity services to identify improper payments, identify and validate other coverage information, and accelerate recovery of overpayments.

**EACH NUMINA LINE ITEM REVIEW TEAM HAS 100%
ACCOUNTABILITY, WITH A CLEAR UNDERSTANDING
TO SET THE BILL REVIEW OBJECTIVE**

***Coding Charges, Claims Denials, Utilization Review,
Rx Rates, Lien Review, Peer Review, Hospital/ASC Bills,
EOBs, Out-of-Network Fees, Surgery Charge Audits***

It takes ongoing education and trained specialists to properly evaluate charges, medical coding, utilization (medical necessity), lab orders, usual & customary rates (U&C), state fee schedules, hospitalization, inappropriate denials, and more.

Numina's experienced clinicians and nurses meticulously check every line item on medical bills to spot and document erroneous coding, duplicate billing, and unsubstantiated or negotiable charges — potentially saving your clients hundreds, even thousands of dollars.
