

# Medicare Set-Aside

## Workers Compensation Case Support Services for Attorneys & Insurers

*Pre-MSA Review • Conditional Payment Services •  
Rx & DME Services • Settlements • Section 111 Reporting*

Get **WCMSA** support where and when you need it most. Our staff includes medlegal experts and clinicians with many years of specialized medical records review experience. We can:

- Review Claimant's current medication regimen
- Identify pre-existing conditions
- Generate detailed breakdown of all medications by prescribing provider
- Review past medical bills to verify causal connection to the injury
- Review Claimant's treatment plans by Provider
- Generate payment histories giving breakdown for medical, indemnity, and expense categories
- Review all recommendations for future prescription regimen
- Identify significant issues of the case such as previous injuries that affect resolution of accepted injury; underlying medical conditions that can affect type of future medical care necessary; underlying medical conditions that require concurrent medications or treatment but are not related specifically to the work injury; non-treating provider reviews and examinations taking precedence overtreating provider treatment plans
- Review date[s] of injury, age, location, conditions, entitlement information, injury description, and other relevant factors
- Review medical treatment, payment, prescription and pharmacy data
- Review current medical treatment recommendations
- Review functional status, responses to treatment, effectiveness of therapies as established in the records
- Review claimant's past use of healthcare services
- Review multiple medications, prescription drug history, treatment notes, provider medication lists, and physician dispensing data
- Identify cost drivers for future exposure
- Organize medical records, bills, and all reports
- Review against guidelines and provide the baselines/outliers/thresholds
- Prepare a chronological medical record review and summarization
- Identify comorbidities
